EDUCATION

Example Institute of Technology — B.Tech in Electronics and Communication Engineering, 2019 – 2023, CGPA 8.4

SKILLS SUMMARY

Languages: C, C++, Embedded C, Python • Platforms: ARM Cortex-M, ESP32, STM32 • Protocols: I2C, SPI, UART, CAN • Tools: KiCad, Oscilloscope, JTAG debuggers, FreeRTOS

EXPERIENCE

Embedded Systems Engineer, Example Robotics Co, Jul 2023 – Present — Designed firmware for a sensor-fusion module running on an STM32 microcontroller; implemented a low-power sleep mode reducing battery draw by 40%; wrote hardware abstraction layer used across three product lines.

PROJECTS

Automated Gate System — Designed a boom barrier automation system using ESP32 microcontrollers with sub-second response times, driven by a custom PCB and FreeRTOS scheduler.
